

ACO Building Drainage

Overview

ACO Building Drainage

ACO Building Drainage specialises in the development of corrosion resistant drainage systems and building products for applications across the internal and external built environments.

We engineer high performance drainage products and systems for a wide range of commercial, industrial and residential applications. ACO Building Drainage is well equipped to ensure your drainage needs are met whether you need the very highest quality bespoke product, a hygienic drainage solution or products that optimise on-site health and safety for building users.

We manufacture our products from pickle passivated stainless steel to optimise durability and product life and there's a wide range of styles to choose from so you never need to compromise performance for design.

Benefits

- Wide range of Drainage products
- Bespoke designs to suit your project
- Optimise installation
- Minimise lifetime ownership cost
- Sustainable drainage solutions

ACO RoofBloxx - create a sustainable blue/green roof drainage system

Applications

- Food Factories
- Commercial & Industrial
- Commercial Kitchens
- Roof & Terrace
- Access Covers
- Health & Education
- Leisure & Public
- Residential
- Blue/Green Roofs

Product Range Overview

We can help you manage grease in your commercial kitchen

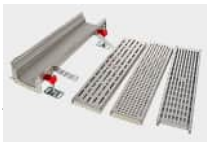

Our stainless steel drainage systems can be designed to your project specifications

ACO Stainless Steel Gullies

ACO gullies are the culmination of many years of practical experience and design expertise in stainless steel fabrication technologies. Our state of the art European plants produce products of consistent outstanding quality with economic benefits that can only be realised through the most advanced manufacturing methods. Our square and round gullies can cater for a wide range of flow rates for a numerous applications. They are manufactured in austenitic stainless steel grades 304 or 316 and are fully pickle passivated in order to ensure corrosion free joints.

ACO Stainless Steel Modular and Galvanised Channels

Modular 125+ linear drainage channels are available as an off-the-shelf option, including a wide choice of lengths, inverts and gratings. These can also be modified to specifically suit your requirements. Our Hygiene First Channels enable faster cleaning for environments like food processing and commercial kitchens. We have a wide range of channels that can be designed to suit your project whether the application is on the roof terrace, facade or inside the building.

ACO Roofbloxx for Blue/Green Roofs

ACO Roofbloxx is a complete roof attenuation system for blue/green roofs. It enables engineers to create a drainage platform that gives architects the design flexibility required to create imaginative, multi-functional open green spaces at roof or podium level. Comprising a shallow, high-strength, adjustable geocellular storage void and roof outlet flow control system, ACO Roofbloxx is fully compatible with ACO roof outlets, downpipes and surface water drainage systems.

ACO Access Covers

ACO's specialist floor access covers are suitable for use in a wide range of commercial and industrial applications. Designed to provide easy access to underlying building services and ducting, standard and engineered covers are available in aluminium, stainless steel and galvanised steel. ACO Access covers come in a wide range of sizes to meet specific project requirements and benefit from a high quality finish. Our access covers are fully tested and classified to the Fabricated Access Cover Trade Association (FACTA) specifications.

ACO Shower Drainage Channels, Gullies and Grates

Manufactured to an extremely high standard, ACO's range of stainless steel shower drainage channels, gullies and gratings is perfect for use in a domestic, hotel or swimming pool environment. Available in a range of designs and styles our shower products can provide the ideal finish to any wetroom, walk in shower or bathroom environment.

ACO Grease Management Solutions

Commercial Kitchens are challenging working environments and regardless of whether you operate a sizeable commercial kitchen or are the owner manager of a small catering establishment, fats, oils and Grease (FOG) can have major impact on your business. ACO's high performance grease traps and separators are specifically designed to help prevent the build-up of FOG in kitchen drainage system and ultimately avoid a fatberg in the sewer network.

ACO Roof Outlets

ACO Building Drainage has a wide range of aluminium rainwater outlets and car park gullies which are suitable for use in a variety of commercial, industrial and residential applications. Cost effective and durable, our range is capable of handling high flow rates to minimise the number of outlets required.

ACO Pipe

The ACO PIPE range provides our customers with access to high quality stainless steel pipe and fittings in sizes ranging from 50mm to 315mm. We also have a comprehensive range of more than 2,000 stainless steel accessories. ACO's GM-X pipe range of socketed galvanised steel pipe products is designed for external applications, such as rainwater drainage, where a robust and highly durable system is required.
