## ACO HexDrain®

ACO HexDrain® is a lightweight polypropylene drainage channel system, ideal for pedestrian areas, patios and cycleways. A choice of 'Complete the Look' gratings are available to provide the perfect finish.

## ACO HexDrain® Garage Pack

ACO HexDrain® Garage Pack contains all components required to install a drainage system across a garage threshold. With all the features and benefits of ACO HexDrain®, this is a convenient pack for a typical garage threshold installation.

## ACO RainDrain®

ACO RainDrain® is a light duty drainage channel with galvanised steel grating, suitable for pedestrian areas, patios and cycleways. A choice of 'Complete the Look' gratings are available to provide the perfect finish.

## ACO Complete the Look

ACO's range of elegant and modern 'Complete the Look' gratings provide choice and style to patio projects. Designed for use with the market – leading HexDrain® and RainDrain® drainage channels. A choice of gratings are available to provide the perfect finish.

## Water Positive CPD

[www.aco.co.uk/water-positive](http://www.aco.co.uk/water-positive)

Safeguarding water is essential for sustaining life and the environment. Our new CPD explores sustainable water management practices and technologies that can be incorporated into construction projects to achieve positive environmental outcomes.

## ACO HexDrain® B 125

ACO HexDrain® B 125 is manufactured from recycled polypropylene, and is ideal for driveway applications. The channel comes complete with a corrosion resistant black composite Heelguard grating.

## ACO RainDrain® B 125

ACO RainDrain® B 125 is the ideal drainage solution for driveway applications. The channel is manufactured from Vienite®, ACO's high strength recycled polymer concrete material, and comes complete with a Cast Iron Heelguard Atec grating.

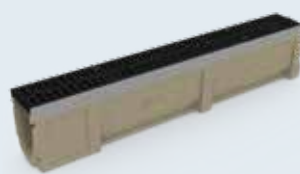

## ACO HexDrain® Pro

ACO HexDrain® Pro is manufactured from recycled polypropylene. The channel comes complete with a corrosion resistant black composite Heelguard™ grating, and is suitable for vehicle traffic up to Load Class C 250. Ideal for driveways and private car parks.

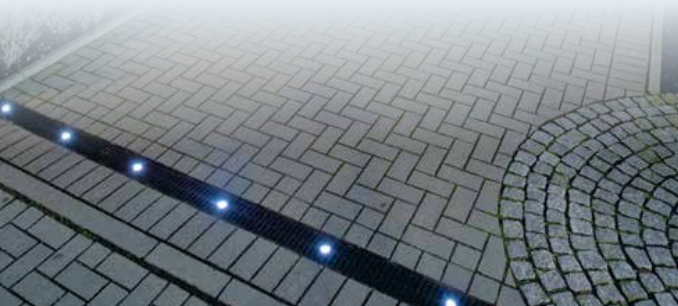

## ACO CivicDrain®

ACO CivicDrain® is manufactured from Vienite, ACO's high strength polymer concrete material. The channel comes complete with a corrosion resistant black composite Heelguard™ grating, and is suitable for vehicle traffic up to Load Class C 250. Ideal for driveways and private car parks.

## ACO Eyeleds

ACO Eyeleds combines attractive lighting options with efficient surface water drainage for driveways, patios and pedestrian precincts. Channels are available with 2 Eyeled gratings or with 1 Eyeled and 1 standard B 125 composite grating with a choice of white or blue LED.

## ACO HexDrain® Brickslot

ACO HexDrain® Brickslot is ideal for domestic applications where discreet slot drainage is required for the collection of surface water. The channel comes complete with an offset slotted grating, ideal for block paving up to and including 60mm.

## ACO RainDrain Brickslot

ACO RainDrain® Brickslot B 125 is perfect for driveway applications where discreet slot channel drainage is required for the collection of surface water. The channel comes complete with an offset slotted grating, suitable for block paving up to and including 60mm.

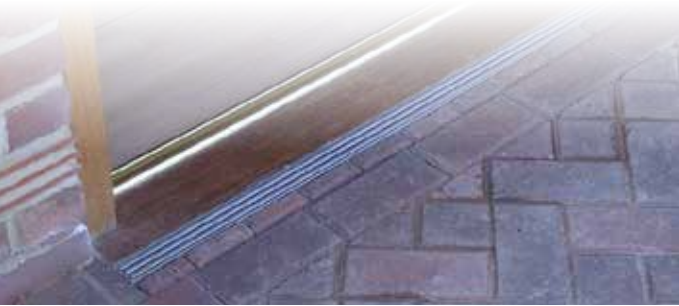

## ACO Threshold Drain

ACO Threshold Drain is a slim modern drainage system for level thresholds and patios. The discreet system has a width of 60mm and is available with silver or black aluminium, CorTen or Stainless Steel gratings.

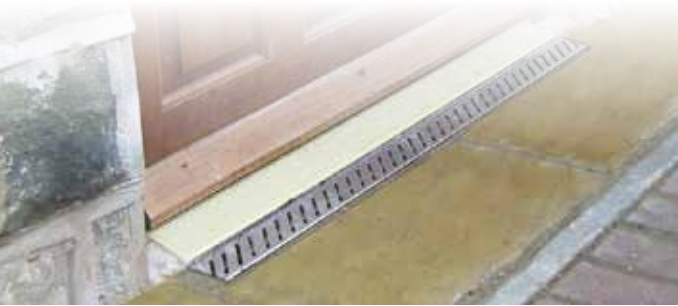

## ACO StepDrain

ACO StepDrain is a threshold drainage system designed to eliminate water ponding at house entrances. The system comes complete with a corrosion resistant 304 stainless steel Heelguard grating suitable for pedestrian traffic.

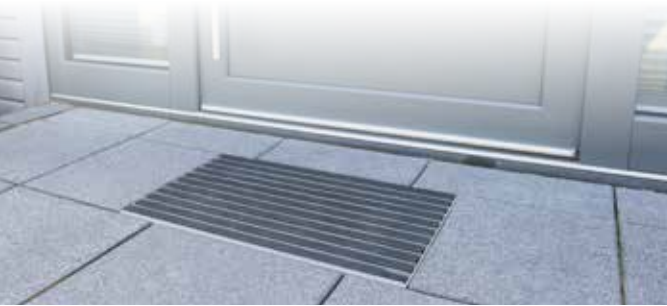

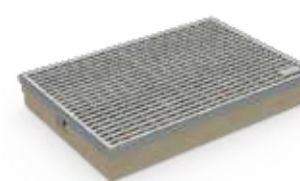

## ACO DoorWay Drain

ACO DoorWay Drain eliminates water ponding at house entrances. The system comes complete with a two-piece, corrosion-resistant Heelguard grating suitable for pedestrian traffic.

## ACO DrainMat

ACO DrainMat is a high-quality matwell assembly that eliminates the risk of water ponding at house entrances. The system gives the appeal of a traditional matwell and is available in a choice of four different mat surfaces.

ACO House & Garden

Product Range Overview

# Water Positive

What is the initiative and how can you get involved?

[www.aco.co.uk/water-positive](http://www.aco.co.uk/water-positive)

Caring for water is at the very heart of sustainable development. Only when water is properly cared for can it be a renewable resource that facilitates life.

Removal of water as soon as possible can no longer be a starting consideration for any project. Careful thought must be given to design and technology that enables appropriate collection, cleaning, holding, and reuse of water in order to protect and enhance the natural environment.

ACO's Water Positive assists in delivering sustainable water management for the built environment by demonstrating how caring for water can be achieved through three core project considerations: Technology, Design and Environment.

**Let us help you achieve a Water Positive project**

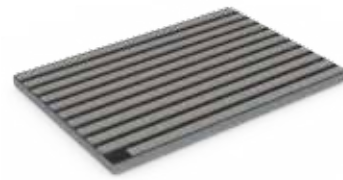

Our teams are here to equip you with the knowledge you need to progress your project quickly and confidently.

[www.aco.co.uk/askaco](http://www.aco.co.uk/askaco)

## ACO Indoor

ACO InDoor is a high quality matwell assembly, for interior use. Two hard wearing and attractive mat finishes are available; with a light grey or anthracite carpet on a robust aluminium base. The system is compliant with Part M of the Building Regulations for England and Wales and Section 4 of the Scottish Building Standards.

## ACO BorderGuard

Manufactured from 100% recycled materials, ACO BorderGuard is a lightweight rapid paviour haunching system. ACO Borderguard can be used with any choice of ground covering whether it is lawn, flowerbed or bark chips.

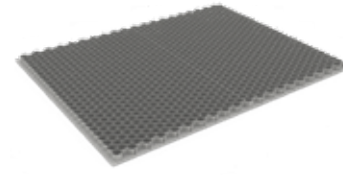

## ACO GroundGuard

ACO GroundGuard is a ground reinforcement system for grass or gravel stabilisation, reducing the risks of potholes, rutting or grass damage. The system is 90% porous, providing effective drainage of surface water. The robust system is certified for loads up to 250 tonnes per m<sup>2</sup>.

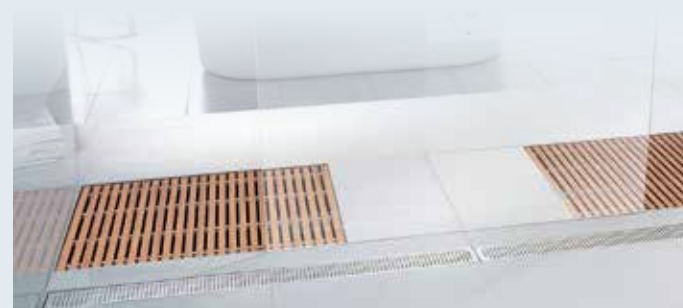

## ACO GravelGuard

ACO GravelGuard is a honeycomb gravel stabilisation tile with an integrated geo-textile that helps to reduce weed growth and speeds up installation. The tile is ideal for driveways, paths and shed bases. Also available in Grey Eco, made from 100% recycled material.

## ACO ShowerDrain C Line

The ShowerDrain C series is characterised by modern design, perfect functionality and high-flow capacity. This high-quality stainless steel shower channel system is available with a wide range of stylish grating designs to suit individual decorative requirements.

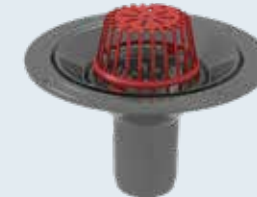

## ACO Shower Gullies

ACO Shower Gullies are an essential addition to modern bathroom and wet room designs. The units are compatible with tiled and flexible sheet flooring, and come in a variety of grating designs to give your wetroom floor a remarkable appearance.

## ACO Rainwater Outlets

ACO have a range of high performance, lightweight rainwater outlets for commercial and residential applications. All ACO Rainwater Outlets are manufactured from diecast marine-grade LM6 aluminium silicon alloy which is corrosion resistant, weather-proof and resistant to ultra-violet radiation.

## ACO Anti-Backflow Valves

ACO Anti-Backflow valves prevent flooding as a result of sewer backflow. Three ranges of anti-flood backflow valves are available for grey and black water applications.

## ACO Domestic Soakaway

Award winning domestic soakaway for the infiltration of surface water in domestic applications. Manufactured from recyclable plastic, ACO StormBrixx is easy to handle and quick to install. Its high void ratio reduces the cost associated with traditional soakaways.

## ACO Nest Box

The ACO Nest Box has been designed to provide a sheltered nesting refuge for small birds. The box is three standard brick courses high and half a brick course in width, so is easy to build in to a wall during construction or can be retrofitted to existing buildings.

## ACO Bat Box

The ACO Bat Box has been designed to provide a sheltered roost for bats. The box can be installed into a new wall or retrofitted to existing buildings. The inside of the box is grit-blasted to provide a surface for the bats to grip, and a wooden insert is fitted to also provide a suitable gripping surface.

## ACO Refuge

The ACO Wildlife Refuge provides shelter for different types of small animals. Five refuges are available with different openings and sizes which prevent predators from gaining access while allowing smaller animals to move to safety.
