

Floor Access covers for building applications

ACO's specialist floor access covers are suitable for use in a wide range of commercial and industrial applications. Designed to provide easy access to underlying building services and ducting, standard and engineered covers are available in aluminium, stainless steel and galvanised steel.

ACO Access covers come in a wide range of standard sizes or as bespoke engineered solutions to meet specific project requirements and provide a high quality finish. Manual lift and gas spring assisted opening options available. All covers are supplied with lifting keys and cover security is ensured by the inclusion of stainless steel locking screws.

Product Range Overview

Our Access Covers are fully tested to FACTA specifications

Our bespoke covers offer solutions for a wide range of applications.

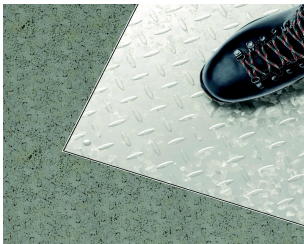

ACO UniFace™ recessed floor access cover range

The ACO UniFace™ range is designed to blend perfectly with a wide selection of both hard or flexible floor infills of thicknesses up to 15mm. ACO UniFace™ recessed access covers are available in either aluminium, hot dipped galvanised steel or stainless steel grade 304 as standard (stainless steel grade 316 options to special order).

The range provides simple access to underlying services and all products are fitted with both liquid and odour tight EPDM seals as standard. Manual lift and gas spring operated options are available, and cover security is ensured by the inclusion of stainless steel locking screws. Single, duct or multipart access covers are available, making the ACO UniFace™ range extremely versatile with covers suitable for pedestrian, light vehicle and medium duty fork-lift truck applications.

- ❑ **Typical application areas-** Offices, Shopping Centres, Transport Hubs, Leisure Facilities, Residential, Hospitals, Education, Warehousing, Kitchens, Landscaping
- ❑ **Suitable Flooring Types-** Concrete, Epoxy, Terrazzo, Carpet, Wood, Stone tiles, Ceramic tiles, Vinyl.

ACO UniTop™ solid access cover range

The ACO UniTop™ range provides contrasting aesthetics and easy identification in hard floor and pavement finishes.

ACO UniTop™ solid access covers are available in either aluminium, hot dipped galvanised steel or stainless steel grade 304 as standard (stainless steel grade 316 options to special order).

For safety in use all solid covers have a raised slip resistant surface and fitted with a single liquid and odour tight EPDM seal as standard.

All covers are locked by stainless steel screws for security in use and can be supplied either as manual lift or gas spring assisted opening options.

Single or duct multipart access covers are available, making the ACO UniTop™ range suitable for a wide range of pedestrian and light vehicle applications

- ❑ **Typical application areas-** Offices, Shopping Centres, Transport Hubs, Leisure Facilities, Residential, Hospitals, Education, Warehousing, Kitchens, Landscaping.
- ❑ **Suitable Flooring Types-** Concrete, Epoxy, Screed

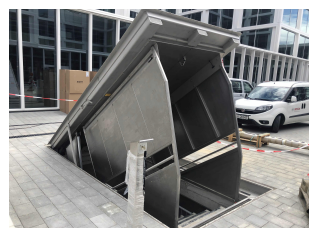

ACO Bespoke Access Covers

As a planner or architect, you are always looking for reliable partners and answers to your very specific problems. For every challenge there is always a solution.

ACO can provide bespoke Access Covers for your project. These can be sized as you need with multiple hatches. We can manufacture these in either aluminium, hot dipped galvanised steel or stainless steel grade 304 and grade 316 with manual or assisted opening designs.

ACO Bespoke covers can be designed to different load classes for both pedestrian areas and for heavy traffic areas. Our bespoke aluminium covers are normally available in around 10 working days. Lead times for Bespoke covers in other materials are available on request.

- ❑ **Typical application areas-** Offices, Shopping centres, Airports, Logistics hubs, Leisure facilities, Hospitals, Landscaping, Education, Warehousing, Kitchens, Residential
- ❑ **Suitable Flooring Types-** Unique designs to accommodate a wide range of flooring and paving types.
