* Not suitable for carriageways of public roads or motorways.

Key:

Load Classes And Typical Uses

**A 15:** Pedestrian and cycleways**B 125:** Pedestrian precincts, light vehicles, private car parks.**C 250:** Parking areas, service stations (cars) and slow-moving light commercial vehicles.**D 400:** Public highways, parking areas for all types of vehicles.**E 600:** Industrial areas, heavy wheel loads, slow-moving HGV's and forklifts, service stations.**F 900:** Airport runways, very heavy industrial and military installations, service yards and lorry parks.

Suitability

✓ Recommended

HeelGuard™ grate openings are no more than 10mm to reduce risk of a shoe heel becoming caught in the grate.

Invert Type: The tables for ACO channels list a number associated with the Invert Type. This number highlights the drainage design which can be achieved when using these channels. The key for the Invert channel types is shown below.

1 – Constant Depth Invert

2 – Sloping Invert

3 – Stepped Invert

Why choose ACO Water Management: Civils + Infrastructure products?

ACO Water Management: Civils + Infrastructure supplies intelligent solutions for civils drainage professionals.

The portfolio offers a wide variety of surface water management systems designed to provide the optimum solution in stormwater control.

Suitable for a range of applications including parking areas, retail and commercial developments, highways and residential developments, the product range includes oil separators, stormwater attenuation and infiltration systems, high capacity and channel drainage systems to suit all specifications.

These products save contractors' time and stockists' space by keeping the product ranges strictly relevant to the civils market requirements.

This document details products in the ACO Water Management: Civils + Infrastructure ranges.

These ranges fall into two primary categories: the first, **Surface Water Drainage**, deals with the direct and immediate collection and drainage of surface water from a particular area. The second, **Stormwater Control**, deals with the storage and control of accumulated water that may be from more than one drained area.

In addition, ACO have added the **Rail**, **Sports** and **Wildlife** ranges to this product guide. For Rail please go to page 106. For Sports please go to page 108 and for the Wildlife range go to page 114.

General information

ACO products are subject to weight and dimensional tolerances. The weights and dimensions shown in this document are for guidance purposes only. ACO products are made from naturally occurring materials and may be subject to variations in colour, texture and marking. These aesthetic variations do not affect the performance or functionality of our goods. The appearance of products shown in our company documentation is for illustration purposes only.

Important information

Compliance documentation for ACO products that are covered by the Construction Products Regulation 2011 (CPR) can be downloaded at [www.aco.co.uk/construction-products-regulation-\(cpr\)](http://www.aco.co.uk/construction-products-regulation-(cpr))

Surface + Grating Visualiser

A clever, yet easy to use software program that visualises how our range of grating designs could look in your project. To make specification easier, the software will suggest our most suitable ranges based on the project requirements. You can then select from the available options and visualise how these may look in different surface finishes. Once a choice is made, a simple, yet detailed specification sheet provides full product information.

Visit www.aco.co.uk/gratingvisualiser to find out more.

Important Notes:

Areas	This document refers to England and Wales excluding post code areas (For Channel Islands, Isle of Wight, Isle of Man, N. Ireland & Eire please contact the Sales Office). This document refers to Scotland excluding post code areas IV, KW, AB, HS and ZE, for these post codes please contact the Sales Office					
Pack Quantities	Minimum recommended order quantities are shown against individual products in this price list.					
Customer Orders	ACO do not accept verbal orders. Written orders can be sent via fax, e-mail or EDI					
Order Cut Off Times	All orders for stock items accepted before 12 noon will be delivered 3 working days later (for 4 day lead times) and are subject to public holidays.					
	Orders received by 12.00 noon on:	Monday	Tuesday	Wednesday	Thursday	Friday
	Delivery due:	Thursday	Friday	Monday	Tuesday	Wednesday
Lead times	Lead times quoted are subject to availability and order volumes.					
Deliveries	Standard deliveries are Monday to Friday between 8am and 5pm, out of hour's delivery may be possible. Please contact the Sales office for further details.					
Delivery Offload	All deliveries are made on curtain-sided vehicles for off-load by the customer. Specialist offload services may be available, check for availability and price. This may have an impact on lead times.					
Order Amendments and Cancellations	Order amendments and cancellations must be received in writing. Cancellations or amendments requested the day prior to despatch up to 10am will incur charges of £25 per pallet/package. Cancellations or amendments after 10am on the date prior to despatch will incur a 35% administration and restocking fee as the order will have been processed. Delivery refusals will incur a return carriage charge and if applicable a 35% administration and restocking fee. Fees are based on order values.					
Stock Returns	Returns are subject to prior written agreement and a 35% re-stocking charge. Additional transport charges may apply. Goods must be in a re-saleable condition as delivered, safely palletised and labelled prior to collection.					

Delivery Charges:

Standard delivery is £250.00 for core stock products and £125.00 for non core stock products where applicable and Stormwater Control are in the table above. Other delivery services are available. Please contact the Sales Office for pricing and lead times.

Collection:

Collections must be pre-arranged 48 hours or more prior to collection date. ACO collection reference must be quoted at time of collection. Collections only possible Monday to Friday between 8am and 4pm.

This document is in addition to our standard Conditions of Sale which can be found at the back of this product guide or on the ACO website www.aco.co.uk
Further copies are also available from the Sales Office. To contact the Sales Office please call 01462 816666.

ACO Multiline Sealin

Suitable for load class applications A 15, B 125, C 250, D 400†

ACO Multiline Sealin integrated seal channel drainage system. All channels are manufactured from polymer concrete with integrated seal, and have 100mm internal width with galvanised steel protective edge rail. Channels are for use with ACO Drainlock™ bar-less locking gratings and covers.

Image shows channel with grating. Grating supplied separately please see note.

ACO ATec high performance finish

ACO ATec finish that provides a superior resistance to corrosion. The electrochemically applied finish is strong and durable, making maintenance easier than on water-based surface coatings. The ACO ATec finish also enhances long term durability in demanding environments and is particularly well suited for low trafficked areas. Please download our ATec datasheet for more information.

ACO MultiDrain® M100D / M100PPD galvanised steel Brickslot ST gratings

Suitable for Load Class applications A 15, B 125, C 250, D 400†
Also compatible with Multiline Sealin V100S

A range of galvanised steel discreet slot drainage gratings and access units for use with ACO MultiDrain® M100D channels with UltraSTEEL™ galvanised steel protective edge rail and ACO MultiDrain® M100PPD channels with galvanised steel protective edge rail. The offset grating has a 10mm HeelGuard™ drainage inlet, and is compatible with most types of pavements, setts and flags up to a maximum of 100mm deep.

See page 38 for grating accessories.

Note: ACO MultiDrain® MD stainless steel gratings are manufactured from Grade 304 stainless steel and are fitted with ACO Drainlock™ as standard.

ACO Brickslot ST Stainless Steel gratings also available for this channel system please see page 19.

ACO MultiDrain® M100DS stainless steel Brickslot ST gratings and access units

Suitable for Load Class applications A 15, B 125, C 250, D 400†

A range of stainless steel discreet slot drainage gratings and access units for use with ACO MultiDrain® M100DS channels with stainless steel protective edge rails. The offset grating has a 10mm HeelGuard™ drainage inlet, and is compatible with most types of pavements, setts and flags up to a maximum of 100mm deep.

⚙ HeelGuard™ grating.

See page 38 for grating accessories.

ACO ATec coating is a high performance finish that provides a superior resistance to corrosion. The electrochemically applied finish is strong and durable, making maintenance easier than on water-based surface coatings. The ATec finish also enhances long term durability in demanding environments and is particularly well suited for low trafficked areas. Please download our ATec datasheet for more information.

ACO MultiDrain® M150D/M150PPD galvanised steel gratings and access unit

Suitable for Load Class applications A 15, B 125, C 250, D 400†

A range of galvanised steel discreet slot drainage gratings and access units for use with ACO MultiDrain® M150D channels with UltraSTEEL™ galvanised steel protective edge rail and the ACO MultiDrain® M150PPD channels with galvanised steel protective edge rail. The offset grating has a 10mm HeelGuard™ drainage inlet, and is compatible with most types of pavements, setts and flags up to a maximum of 100mm deep.

ACO ATec high performance finish

ACO ATec coating is a high performance finish that provides a superior resistance to corrosion. The electrochemically applied finish is strong and durable, making maintenance easier than on water-based surface coatings. The ATec finish also enhances long term durability in demanding environments and is particularly well suited for low trafficked areas. Please download our ATec datasheet for more information.

ACO MultiDrain® M200D / M200PPD galvanised steel Brickslot ST gratings and access units

Suitable for Load Class applications A 15, B 125, C 250, D 400†

A range of galvanised steel discreet slot drainage gratings and access units for use with ACO MultiDrain® M200D channels with UltraSTEEL™ galvanised steel protective edge rail and the ACO MultiDrain® M200PPD channels with galvanised steel protective edge rail. The offset grating has a 10mm HeelGuard™ drainage inlet, and is compatible with most types of pavements, setts and flags up to a maximum of 100mm deep.

To remove the ACO Brickslot ST access unit, insert the lifting tools as shown in figure 1. Then lift the tray vertically from the frame (figure 2). Details of the lifting tool (product code 1367) can be found on page 38.

Freestyle gratings

Suitable for Load Class applications B 125, C 250, D 400†

Design your own bespoke ductile iron grates with ACO Freestyle. ACO's expertise in manufacturing high quality grates will be utilised to create your own artistic grates. ACO Freestyle gives designers and architects the ability to extend their design concept throughout the external landscape. Grates are compatible with ACO MultiDrain® channels, are load class D 400 and incorporate ACO's Drainlock™ boltless locking system. ACO Freestyle range also offers a large range of ready-to-order grates which have previously been designed.

1367

Note: 1m grates require 2pcs of Security locking assemblies and 0.5m grates require 1pc.

Locking mechanisms for stainless steel grates require a standard allen key. Security key 23416 is not required.

ACO S100

Suitable for Load Class applications D 400†, E 600†, F 900†

ACO S100 polymer concrete channel. All channels are manufactured from a polymeric based material and have 100mm internal width with cast iron edge rail. Channels have a choice of bolted ductile iron gratings.

Image shows channel with grating. Grating supplied separately please see note.

ACO Multislot – Natural

Suitable for Load Class applications C 250

ACO Multislot polymer concrete channel. All channels are manufactured from polymer concrete and are designed specifically to meet the drainage demands of multi-storey car parks. This low profile channel design is corrosion resistant and has no moveable parts which reduces overall noise.

ACO Multislot – Grey

Suitable for Load Class applications C 250

ACO Multislot polymer concrete channel. All channels are manufactured from polymer concrete and are designed specifically to meet the drainage demands of multi-storey car parks. This low profile channel design is corrosion resistant and has no moveable parts which reduces overall noise.

ACO MonoDrain™ PD100D - Black

Suitable for Load Class applications A 15, B 125, C 250, D 400†

A versatile monocast channel drainage system for surface water conveyance. ACO MonoDrain is a one-piece channel drainage system with an internal width of 100mm, and 8mm HeelGuard™ slots that delivers multiple benefits including safety and sustainability, economical and efficient installation and aesthetic choices across applications such as stations, schools, car parks and commercial areas. The system is CE and UKCA marked and fully certificated to EN 1433:2002.

ACO RoadDrain® 100

Suitable for Load Class applications D 400*, E 600 and F 900

ACO RoadDrain® is a high strength monolithic channel system manufactured from a polymeric based material, which delivers high performance drainage in applications subject to dynamic wheel loads, including motorways, ports, docks and aircraft aprons. These channels are fully certified to BS EN 1433:2002 for applications D 400 to F 900. ACO RoadDrain® complies with specification for Highways Works Clause 517.

ACO Universal Gully

Suitable for Load Class applications A 15, B 125, C 250, D 400, E 600, F 900

The ACO Universal Gully provides fast and simple connection between any channel up to 200mm bore width in the ACO channel drainage range. The high capacity system can be used for silt management and also as an outlet for the drainage system. Manufactured using recycled polyethylene and ductile iron.

NEW! ACO KerbDrain® Inlet Plugs

Reduces cost and CO₂ emissions related to maintenance during installation.

Specifically designed to assist in avoiding costly cleaning caused by debris entering the channels during the installation period. There are two products for our KerbDrain D400 Half Batter and Splay systems, which closes the inlet holes on the channels during initial installation and also the installation of any finished road surface. This helps to reduce the amount of debris associated with installation, from falling into the channels, which leads to costly and time consuming cleaning, which could delay completion of time specific site hand over.

ACO KerbDrain® Splayed Gully and KerbDrain® Accessories

ACO KerbDrain® splayed gully units provide the outfall connection of the system to traditional underground drainage or road gullies, management of silt, and access for maintenance and cleaning. The gully unit also provides fast and simple connection between any sizes of splayed unit within the ACO KerbDrain® range.

ACO KerbDrain® Half Battered Gully and KerbDrain® Accessories

ACO KerbDrain® half battered gully units provide the outfall connection of the system to traditional underground drainage or road gullies, management of silt, and access for maintenance and cleaning. The gully unit also provides fast and simple connection between any sizes of half battered unit within the ACO KerbDrain® range.

NEW! ACO KerbDrain® E Class

Suitable for Load Class applications C 250, D 400, E 600

Certified up to Load Class E 600, KerbDrain E channels are ideal for areas subject to higher wheel loads, such as junctions and roundabouts. With high-capacity channels available for larger catchment areas, the KerbDrain E 600 range delivers maximum durability and efficient surface water conveyance for Highways projects. Each KerbDrain channel has an upstand of 100 and 125mm.

NEW! ACO KerbDrain® E+ Class

Suitable for Load Class applications C 250, D 400, E 600

The ACO KerbDrain® E+ half battered range has a large hydraulic capacity to further compliment our existing KerbDrain® products. With a load classification E 600 this channel can be used in areas subjected to large numbers of high speed heavy goods vehicles and large catchment areas eg distribution yards. Each KerbDrain channel has an upstand of 100 and 125mm.

* Using D class KerbDrain with this gully will require the use of a transition unit.

NEW! ACO KerbDrain® CycleKerb

Suitable for Load Class applications C 250, D 400

ACO KerbDrain® CycleKerb builds on ACO's popular KerbDrain range with products specifically designed for cycle lanes. Able to be connected to our current HB305 channels, the CycleKerb units provide continuous drainage of cycle paths as well as ensuring safe and distinct transitions between pedestrian and non-pedestrian areas. The main CycleKerb unit has an upstand of 60mm.

Product Code	Description	Length [mm]	Width Overall [mm]	Depth Overall [mm]	Invert [mm]	Weight [kg]	Pack Quantity	Lead Time

NEW! ACO KerbDrain® BridgeDeck HB

Suitable for Load Class applications A15, B 125, C 250, D 400

The range is designed with a HB profile, ensuring safety by deflecting vehicles travelling at low speeds back into the main carriageway and away from pedestrians. They are ideal for all types of bridge structures, from footbridges to viaducts. BridgeDeck is available in four different widths, all in 0.5m lengths, with two dedicated expansion joint solutions, and is compatible for use with our other Half Battered KerbDrain product solutions, ensuring a seamless transition between systems. Can be installed to 100 - 125mm upstand.

NEW! ACO KerbDrain® BridgeDeck SP

Suitable for Load Class applications A15, B 125, C 250, D 400

The range is designed to ensure safety by allowing vehicles travelling at high speeds to mount the kerb, preventing them from deflecting back onto the carriageway. They are ideal for all types of bridge structures but should only be used where there are no footpaths, should vehicle traffic be present. Available in four different widths, with two dedicated expansion joint solutions, and is compatible for use with our other Half Battered KerbDrain product solutions, ensuring a seamless transition between systems. Can be installed to 75 - 100mm upstand.

ACO Qmax® 350 System

Suitable for Load Class applications A 15, B 125, C 250, D 400, E 600, F 900

Qmax channels fitted with integral water seals are available with a choice of three edge rail details. Carbon Neutral channels are manufactured from Polyethylene (PE), including recycled material. The system is CE and UKCA marked and fully certificated to EN 1433:2002.

ACO Qmax® 150, 225 and 350 access, outlet/inlet and silt chambers

Suitable for Load Class applications A 15, B 125, C 250, D 400, E 600, F 900

Access chambers for ACO Qmax® channels 150, 225 and 350 channels provide 4-way channel connection, outlet/inlet pipework connections and local silt management. Available with D 400 lockable or F 900 hinged ductile iron slotted cover and frame or D 400 ACO Q-Slot galvanised steel recessed cover and frame.

ACO Q-Ceptor

ACO Q-Ceptor oil separators are an innovative range of bypass and full retention separators. These high performance systems are fully compliant with BS EN 858:2002 parts 1 & 2 and exceed the requirements of the Environment Agency's PPG 3 guidelines. ACO Q-Ceptors are available in a range of chamber sizes and flow rates and are ideal for treatment of surface water in car parks, maintenance areas, and industrial and residential applications.

NEW! ACO StormSed Vortex

The ACO StormSed Vortex is an advanced hydrodynamic separator that removes sediment bound contaminants. The design enables removal of pollutants by means of settlement and the capture of floatables. It's available in a range of sizes to accommodate small to large sites and can be custom made for demanding installations. The ACO StormSed Vortex retains solid pollution and oil. It also forms part of the SuDS management train as it removes over 50% of fine Total Suspended Solids as well as sediment bound metals and hydrocarbons.

NEW! ACO StormSed Filter

The ACO StormSed Filter is a multi-process system that combines four crucial processes – filtration, sedimentation, adsorption, and precipitation – which enables the filtration of highly contaminated stormwater.

The filter media contained in the ACO StormSed Filter retains small size particles without clogging, oil and floatables, and dissolved pollutants. It is available in a range of sizes to accommodate small to large sites.

The high level of treatment of the ACO StormSed Filter ensures that over 90% of Total Suspended Solids, as well as key pollutants such as Zinc (Zn), Lead (Pb), Copper (Cu) are removed and retained.

ACO Q-Brake Vortex

ACO Q-Brake Vortex is an individually configured vertical vortex flow control designed to regulate stormwater flow before it discharges into the watercourse or sewer networks. The system is capable of flow rates between 2-100l/s and a design head height of up to 3m. All ACO Q-Brake Vortex flow controls are manufactured from grade 304 stainless steel and sized bespoke to the specific project requirements. The ACO Q-Brake is available in three different variations: Flat & Round Wall: To match the exact shape of the chamber QBrake PN16: Includes a PN16 flange adaptor for connection into an above surface level attenuation chamber.

Q-Brake Flat Wall

Q-Brake Curved Wall

Q-Brake PN16

If you require further informations or a quotation please contact our dedicated ACO Storm Water Control team on **01462 810304** or email suds@aco.co.uk

To assist with the quote process the “parameters” listed below are required to ensure the correct product is specified.

Project name and location		
Design head (metres “Y”)		
Design flow rate (litres per second “X”)		l/s
Depth of sump		(minimum 200mm)
Manhole reference		
Manhole outlet pipe internal diameter (mm)		(min mmØ)
Q-Brake to fit against curved wall or flat wall	Curved / Flat *	(*delete as appropriate)
Manhole diameter (if fitting against a curved wall)		(min mmØ)

ACO Q-Plate Orifice Plate

Manufactured from grade 304 stainless steel, the ACO Q-Plate is designed to regulate stormwater flows in projects where a flow control is not the most effective solution, or where flows are greater than 100l/s. Each Q-Plate is designed bespoke to match the specific project requirements. The ACO Q-Plate is available with either a curved or flat wall to fit against the required chamber shape. Remote access to the system can be provided by the optional Drain Down door and the emergency drain facility - simplifying access and removing the need for direct man access to sewer manholes.

Rail

A major part of ACO's portfolio includes manufacturing specialist water management systems for the UK's national rail and light rail networks. As a long-term supplier to the rail sector, ACO understands the importance of delivering high-performance, sustainable drainage systems.

ACO is involved in all scale of rail projects from HS2 and Crossrail to the Metrolink in Manchester. The extensive product range can be applied to a wide variety of applications including stations and curtilage, platforms, maintenance depots, station parking and parking decks.

ACO TramDrain 200

Suitable for Load Class applications D 400

The ACO TramDrain 200 is a high capacity one-piece drainage system designed to provide efficient surface water drainage for combined tram and vehicular traffic running areas. ACO TramDrain is specifically designed to provide drainage for the grooved rail, 4-foot and 6-foot areas of the track slab and the full width of swept path.

ACO V100G Tram Drain

Suitable for Load Class applications C 250 and E 600

The ACO V100G Tram Drain is designed to provide efficient surface water drainage for the 4-foot and the grooved rail profile of the tram track.

T0200	ACO V100G Tram Drain channel	1435	135	160	39.6	1	Call sales

ACO Rail Access Point

Suitable for Load Class applications D 400

ACO's innovative rail access point has radically improved the installation and maintenance practices of rail drainage. Utilising ACO's polymer concrete, which is naturally less conductive, gives these units significantly superior performance against stray currents compared to purely metal access points. Units are fitted with a mesh stainless steel grate giving full visible inspection to the vertical drainage pipe and the rail catchment area, making it quick and easy to inspect for blockages without removing the grate. This ACO Rail access point is designed to suit 41GPU rail profiles.

32614	Rail access point black c/w stainless steel mesh grate	277	309	172*	15.7	1	Call sales
32615	Rail access point grey c/w stainless steel mesh grate	277	309	172*	15.7	1	Call sales

* Not including adjustable leg height

ACO HeelGuard™ 6mm Rail Intercept Grate

Suitable for Load Class applications D 400

Designed to meet the requirements of rail platforms and rail building curtilage, these grates are compatible with MultiDrain MD and MultiDrain PPD channels. They feature 6mm wide slots and have very high skid and slip resistance. Each grate is fitted with ACO's bar-less Drainlock™ which improves hydraulic capacity. They are also compatible with ACO's security locking bars for added protection in high theft/vandalism areas.

23511	M100D/PPD HeelGuard™ 6mm Rail Intercept, ductile iron grate	500	123	21	4.0	200	Call sales

Note: For channel details please refer to ACO MultiDrain section from page xx onwards and locking bars on page xx onwards.

Sport

ACO Sport is a division of the ACO Group, which has been providing top-class drainage and stadia solutions for sporting facilities, stadia and arenas for many years. Since 1972, ACO Sport systems have been installed in Olympic stadia all over the world and are designed to maximise athletic sporting performance.

ACO Sport drainage solutions can be found in venues of all sizes, from football stadia, sports and golf clubs to school playing fields. They are equipped with a full range of drainage systems to support the areas of track and field, sports pitches and buildings and access points.

SuDS

ACO SuDS solutions support the easy connection and distribution of water within green areas like swales and raingardens, reducing installation and maintenance costs.

Product Code	Description	Length [mm]	Width Overall [mm]	Depth Overall [mm]	Weight [kg]	Pack Quantity	Lead Time
--------------	-------------	----------------	--------------------------	--------------------------	----------------	------------------	--------------

ACO SuDS Swale Inlet

ACO SuDS Swale Inlet is an aesthetically pleasing, low maintenance solution for drainage outfall connections discharging into shallow vegetated channels or SuDS features. Available as standard in natural, grey and black. Optional grating kit also available for applications that require a greater degree of protection.

27111	ACO SuDS Swale Inlet - natural	1150	580	365	76.0	1	Call sales

*Grating and mesh kits contain: 1 x Grade 304 Stainless Steel mesh grating, 3 x anchors, 3 x washers and 3 x fixing screws
+ Ground Anchor kit contains 2 x ground anchors, 2 x washers and 2 x bolts

ACO SuDS Combipoint SSA

Suitable for load class applications D 400

Designed to remove sediment from surface water, when used in combination with SuDS features the Combipoint SSA can remove the need for large sediment forebays. Incorporating this unit into the SuDS management train provides an easy to maintain point source for sediment and improves the long term performance of swales, ponds or bioretention areas which have no sediment removal system.

ACO SuDS Infiltration Channel Outlets

Channels are often connected directly to raingardens or bioretention areas, as a method of connecting downpipes or as a way to intercept water sheeting over sloping pedestrian areas. These connection plates make it quick and easy to disperse the water from the channel into SuDS features, aiding plant irrigation and preventing localised ponding or erosion.

27301	SuDS Infiltration channel outlet for M100D/DS	102	135	150	0.3	1	Call sales
27302	SuDS Infiltration channel outlet for M150D/DS	102	185	210	0.4	1	Call sales
27303	SuDS Infiltration channel outlet for M200D/DS	102	235	265	0.6	1	Call sales

Supplied with 80mm perforated pipe connector

Note: For channel details please refer to ACO MultiDrain section from page 10 onwards.

ACO SuDS Overflow Gullies

SuDS components like raingardens or bioretention areas feature overflow pipes. These regulate the freeboard height or point at which the water level can escape during high rainfall. ACO's SuDS overflow gullies are a quick and simple way to complete this detail, with discreet grilled gully systems in ductile iron or plastic versions.

ACO TECHNOLOGIES PLC CONDITIONS OF SALE

1. INTRODUCTION

These conditions shall form part of every contract of sale entered into by ACO Technologies plc ("the Company") to the exclusion of all other terms and conditions including any which the Customer may purport to impose. They may not be varied except in writing signed by an officer of the Company. No contract comes into force until the Company, having received the Customer's purchase order, issues a written acceptance to the Customer pursuant to these Conditions of Sale.

2. DEFINITIONS AND INTERPRETATION

(a) **"Customer"** means the person, firm or company buying or agreeing to buy the Goods and/or Services from the Company.

"Contract" means the contract for supply of Goods and/or Services and comprises the Company's written acknowledgement of the Customer's order, those parts of any design or instruction given by the Customer which have been expressly accepted by the Company in writing (if applicable), the Scheduled Sales Order Agreement (if applicable), the Terms and Conditions of Scheduled Order Agreement (if applicable), the proposal document for bespoke stainless steel design work (if applicable) and these Conditions of Sale.

"Goods" means any goods agreed in the Contract to be supplied to the Customer by the Company (including any part or parts of them).

"Input Material" means any documents, plans or other materials or specifications and any data or other information provided by the Customer in whatever format relating to the Goods and/or Services.

"Output Material" means any documents, plans or other materials or specifications and any data or other information provided by the Company in whatever format relating to the Goods and/or Services.

"Services" means (if applicable) any delivery, design, manufacture, advice or installation services provided by the Company or its sub-contractors.

(b) The headings in these Terms and Conditions are for convenience only and shall not affect their construction.

(c) References to any statute or statutory provision shall, unless the context otherwise requires, be construed as a reference to that statute or statutory provision as from time to time amended, consolidated, modified, extended, re-enacted or replaced.

3. VALIDITY AND ACCEPTANCE

(a) Unless previously withdrawn, the Company's quotation is open for acceptance for the period stated, or if no period is stated, 30 days. All orders (including those not based upon a quotation) must be in writing or by email and are subject to the Company's acceptance in writing. The Customer must ensure that the terms of its order and any applicable Input Material are complete and accurate.

(b) Any representations or warranties made or given by the Company or anyone on the Company's behalf prior to the Company's acceptance of an order and not contained in the Company's written quotation are hereby expressly excluded.

(c) All quotations are made subject to availability of the Goods or materials on receipt of the order.

4. SPECIFICATIONS

(a) All descriptive and shipping specifications, estimates, drawings and particulars of weights and dimensions supplied by the Company are approximate only and the descriptions and illustrations contained in its catalogues, price lists and other marketing materials are intended merely to present a general idea of the goods described therein, unless otherwise stated.

ACO reserves the right to change its marketing materials from time to time without notice to the Customer.

(b) The Company may correct any typographical or other errors or omissions in any marketing materials, quotation, written acknowledgement of the Customer's order, or other document relating to the provision of the Goods and/or Services without any liability to the Customer.

(c) Any advice or recommendation given by the Company or its employees or agents to the Customer or its employees or agents as to the storage, application or use of the Goods and/or Services which is not confirmed in writing by the Company is followed or acted upon entirely at the Customer's own risk, and accordingly the Company shall not be liable for any such advice or recommendation which is not so confirmed.

5. SERVICES

(a) Where the Company has undertaken to provide any Services to the Customer, the Company shall provide the Services subject to these Conditions. Any changes or additions to the Services must be agreed in writing by the Company and the Customer may be charged extra.

(b) The Customer shall at its own expense supply the Company with all necessary documents, plans or other materials, and all necessary data or other information relating to the Services, within sufficient time to enable the Company to provide the Services in accordance with the Contract. The Customer shall ensure the accuracy of all Input Material.

(c) The Customer shall at its own expense retain duplicate copies of all Input Material and insure against its accidental loss or damage. The Company shall have no liability for any such loss or damage, however caused. All Output Material shall be at the sole risk of the Customer from the time of delivery to or to the order of the Customer.

(d) The Services shall be provided using reasonable care and skill and as far as reasonably possible in accordance with the Output Material, subject to these Conditions.

(e) The Company may at any time without notifying the Customer make any changes to the Services and Goods which are necessary to comply with any applicable safety or other statutory requirements, or which do not materially affect the nature or quality of the Services and Goods.

(f) The property and any copyright or other intellectual property rights in:

(i) any Input Material shall belong to the Customer;

(ii) any Output Material shall, unless otherwise agreed in writing between the Customer and the Company, belong to the Company, subject only to the right of the Customer to use the Output Material for the purposes of utilising the Services and/or Goods.

(g) The Customer warrants that any Input Material and its use by the Company for the purpose of providing the Services and/or Goods will not infringe the copyright or other rights of any third party, and the Customer shall indemnify the Company against any loss, damages, costs, expenses or other claims arising from any such infringement.

(h) The Company warrants that any Output Material and its use by the Customer for the purposes of utilising the Services and/or Goods will not infringe the copyright or other rights of any third party, and the Company shall indemnify the Customer against any loss, damages, costs, expenses or other claims arising from any such infringement.

(i) Where the Company supplies in connection with the provision of the Services, any Goods (including Output Material) supplied by a third party, the Company does not give any warranty, guarantee or other term as to their quality, fitness for purpose or otherwise, but shall, where possible, assign to the Customer the benefit of any warranty, guarantee or indemnity given by the person supplying the Goods to the Company.

(j) The Company shall have no liability to the Customer for any loss, damage, costs, expenses or other claims for compensation arising from any Input Material or instructions supplied by the Customer which are incomplete, incorrect, inaccurate, illegible, out of sequence or in the wrong form, or arising from their late arrival or non arrival, or any other fault of the Customer.

(k) The Customer shall provide the Company or its sub-contractors or agents full and proper access to the Customer's site for the Company or its sub-contractors or agents to perform the Services and shall not hinder said performance in any way.

6. SUBSTITUTION

In the event of a shortage of raw materials or component parts specified in the contract for use in the production of Goods the Company shall be entitled to substitute such other materials as it shall consider reasonably fit for such purpose.

7. PRICES

(a) Except where agreed in writing to the contrary, all prices quoted by the Company exclude carriage from the warehouse which shall be charged in addition.

(b) All prices are subject to revision at any time (including after the Company has acknowledged the Customer's order) in the event of any increase in cost caused by circumstances beyond the Company's control and the Company reserves the right to charge such revised prices for Goods and/or Services affected by the increase and remaining to be delivered.

(c) The Customer shall be liable for extra charges required as a result of its instructions, lack of instructions, the inaccuracy of any Input Material or any other cause attributable to the Customer.

8. PAYMENT

(a) Unless otherwise agreed in writing, prices quoted are net of tax, which shall be payable in addition and:

(i) payment for Goods and/or Services within the United Kingdom shall be made on the last day of the month following the month in which the Company's invoice is dated. Time for payment shall be of the essence.

(ii) payment for Goods and/or Services outside the United Kingdom shall be made by irrevocable letter of credit deposited with a London Bank approved by the Company upon presentation of shipping documents or if the Company is unable by reason of the Customer's instructions or lack of instructions to ship Goods when ready, upon notification to the Customer that the Goods are ready for shipment.

(b) In the event of any delay in payment the Company shall be entitled to charge interest at 4% over Bank of England minimum lending rate from time to time, accruing on a daily basis until payment is made, whether before or after any judgment. During any such period of default and at any time when the Company shall have reasonable grounds for doubting that payment will be made on the due date the Company shall be entitled to withhold deliveries on all contracts with the Customer without prejudice to its right to payment for Goods and Services delivered and for work undertaken and expenses incurred in connection with undelivered Goods and/or Services which shall become immediately due and payable on demand.

(c) The Buyer shall make all payments due under the Contract without any deduction whether by way of set-off, counterclaim, discount, abatement or otherwise.

9. TERMINATION AND CANCELLATION

- (a) Either party may (without limiting any other remedy) at any time terminate the Contract by giving written notice to the other if the other commits any material breach of these Conditions and (if capable of remedy) fails to remedy the breach within 30 days after being required by written notice to do so, or if the other goes into liquidation, or (in the case of an individual or firm) becomes bankrupt, makes a voluntary arrangement with his or its creditors or has a receiver or administrator appointed.
- (b) No order for Goods or Services which has been accepted by the Company may be cancelled by the Customer except with the agreement in writing of the Company and on terms that the Customer shall indemnify the Company in full against all loss (including loss of profit), costs (including the cost of all labour and materials used), damages, charges and expenses incurred by the Seller as a result of cancellation.

10. DELIVERY DATES

Delivery dates are estimated only and not guaranteed and are not of the essence. The Company will endeavour to meet the Customer's delivery requirements but shall not be liable for any loss or damage whether direct, indirect, consequential or otherwise (all of which terms include, without limitation, loss of profits, loss of business, depletion of goodwill and like loss) caused by the delay in delivery. Any liability of the Company for non-delivery of the Goods and/or Services shall be limited to replacing the Goods and/or Services within a reasonable time or issuing a credit note at the pro-rata Contract rate against any invoice raised for such Goods and/or Services.

11. TITLE

The Company shall retain title to Goods until payment is made in full in cleared funds in respect of all Contracts. This provision shall not prevent the Customer from selling the Goods for full consideration or embodying them in any construction or apparatus in the normal course of business but in such event (to the extent of its indebtedness to the Company in respect of Goods) it shall act as trustee for the Company of the proceeds of sale or contract price and shall at the Company's request assign the right to receive the same to the Company. The Company's failure to enforce such rights in any case shall not affect its rights in any other case. Without prejudice to the above, until payment is made in full the Customer shall store the Goods (at no cost to the Company) separately from all other goods of the Customer or any third party in such a way that they remain readily identifiable as the Company's property and the Customer grants the Company and its agents an irrevocable licence at any time to enter any premises where the Goods are or may be stored in order to inspect them, or, where the Customer's right to possession has terminated, to recover them.

12. RISK

Risk in the Goods shall pass to the Customer on delivery or immediately prior to off-loading from the delivery vehicle where the Customer undertakes the off-loading or immediately after loading a Customer's vehicle at our premises. If the Customer fails to take delivery or has not provided appropriate instructions, documents or authorisations, risk will pass when delivery is tendered.

13. DELIVERY

- (a) The Company may deliver the Goods and/or Services to the Customer's premises or may agree to deliver the Goods and/or Services direct to the site of any third party.
- (b) Upon the Company notifying the Customer that the Goods are ready for collection or tendering delivery of the Goods the Customer shall agree to accept delivery of the Goods forthwith. If the Company has agreed to deliver the Goods and the Customer shall fail to give proper delivery instructions or to accept delivery as aforesaid it shall be liable for all costs incurred by the Company as a result of such failure (including without limitation storage and insurance) which shall become immediately due and payable on demand but such liability shall not affect its obligation to purchase the Goods or the right of the Company to damages for breach of such obligation.
- (c) Where the Goods and/or Services are to be delivered in installments, each delivery shall constitute a separate contract and failure by the Company to deliver any one or more of the installments in accordance with these Conditions or any claim by the Customer in respect of any one or more installments shall not entitle the Customer to treat the Contract as a whole as repudiated.

14. DAMAGE TO GOODS IN TRANSIT

- (a) The Company shall have no liability in respect of Goods lost or damaged in transit unless the Customer or its agent notes such loss or damage on the delivery receipt and gives notice thereof in writing to the Company and the carrier within three days of delivery or such shorter period as may be required by the carrier's conditions of carriage or in the case of a whole consignment failing to arrive gives notice thereof in writing to the Company within three days of receipt of the Company's invoice or despatch note.
- (b) The Company's liability in respect of Goods lost or damaged in transit shall be limited to repairing or replacing such Goods.

15. GUARANTEE

- (a) All Goods sold by the Company shall be of satisfactory quality but shall not be sold as fit for any particular purpose unless the Customer shall have informed the Company in writing that it is relying upon the Company's skill and judgment and the Company shall have accepted such stipulation in writing.
- (b) The Company will repair or replace any of the Goods or parts thereof in respect of which any defects arise solely from faulty materials or workmanship or (subject to Clause 6 (Substitution) above) from the Company's failure to supply Goods of the quality or specification ordered provided that such defects are notified to the Company in writing within three months of the date of delivery provided as follows:
 - (i) that in the case of defects which would have been apparent to the Customer on reasonable examination of the Goods on delivery the Customer shall notify the Company of the defects in writing within three days of the date of delivery.
 - (ii) that in the case of any other defects the Customer shall notify the Company of the defects in writing within three days of the date when the defects become apparent and
 - (iii) in respect of 15. (b) (i) and (ii) above, that the defective Goods are promptly returned carriage paid.
- (c) Except insofar as any statute provides to the contrary the undertakings contained in the preceding paragraphs of this Clause are given in lieu of and to the exclusion of all conditions, warranties and representations whether express or implied by statute or otherwise as to the quality of the Goods or their fitness for any particular purpose or otherwise and the Company shall have no liability in respect of the Goods and/or Services save as provided in paragraph (b) of this Clause.

16. LIMITATION OF LIABILITY

- (a) Except as expressly provided in these Conditions, the Company shall not be liable to the Customer by reason of any representation, or any implied warranty, condition or other term, or any duty at common law, or under the express terms of the Contract, for any loss of profit or any indirect, special or consequential loss, damage, costs, expenses or other claims (whether caused by the negligence of the Company, its servants or agents or otherwise) which arise out of or in connection with the provision of the Goods and/or Services or their use by the Customer, and the entire liability of the Company under or in connection with the Contract shall not exceed the amount of the Company's charges for the provision of the Goods and/or Services, except as expressly provided in these Conditions of Sale.
- (b) Nothing in these Conditions of Sale will exclude or limit the Company's liability for death or personal injury caused by its negligence or for fraudulent misrepresentation.

17. INDEMNITY

Except insofar as any statute provides to the contrary, the Company shall not be responsible for any loss or damage suffered by any third party caused directly or indirectly by the Goods and/or Services whether as a result of their operation or use or otherwise and whether as a result of any defect therein or otherwise and the Customer shall indemnify the Company from any claim arising from any such loss or damage.

18. THIRD PARTIES

- (a) Where the Customer is selling on the Goods to others it agrees to pass to those others full and accurate information supplied by the Company concerning the Goods, including without limitation product information, specification, advice as to usage and details of all exclusions and limitations.
- (b) The parties do not intend that any term of the Contract will be enforceable by virtue of the Contracts (Rights of Third Parties) Act 1999 by any person that is not a party to it.

19. FORCE MAJEURE

The Company will not be liable for any loss or damage sustained by the Customer by reason of act of God, war, riot, fire, strike, lock-out, governmental control or regulation, abnormal weather conditions, accident, breakdown or any other circumstances beyond the Company's control.

20. GENERAL

- (a) The contract shall be governed by English law and the English courts shall have non-exclusive jurisdiction to determine any dispute between the parties in connection with this Contract.
- (b) The Contract constitutes the entire agreement between the parties, supersedes any previous agreement or understanding and may not be varied except as stated herein. All other terms and conditions, express or implied by statute or otherwise, are excluded to the fullest extent permitted by law.
- (c) Any notice required or permitted to be given by either party to the other under these Conditions shall be in writing addressed to the other party at its registered office or principal place of business or such other address as may at the relevant time have been notified pursuant to this provision to the party giving the notice.
- (d) The Customer shall not be entitled to assign the Contract or any part of it without the prior written consent of the Company.
- (e) The Company may at any time assign, transfer, charge, mortgage, subcontract, declare a trust of or deal in any other manner with all or any of its obligations under the Contract to any third party or agent.
- (f) No failure or delay by either party in exercising any of its rights under the Contract shall be deemed to be a waiver of that right, and no waiver by either party of any breach of the Contract by the other shall be considered as a waiver of any subsequent breach of the same or any other provision.
- (g) If any provision of these Conditions is held by any competent authority to be invalid or unenforceable in whole or in part, the validity of the other provisions of these Conditions and the remainder of the provision in question shall not be affected.
